

RhizoVital P45

Biostimulating bacterial inoculants for strong and healthy plants

Key benefits

- Increased phosphorus mobilization
- Improved tolerance towards abiotic stress
- High compatibility with other fungicides and fertilizers

Easy to use
in IPM

Safe for producer,
consumer and
the environment

No residues, no
WHP and min. REI

Product Facts

Active ingredient

Bacillus velezensis (synonym *B. amyloliquefaciens* ssp. *plantarum*)

Formulation

Suspension concentrate and different dry formulations

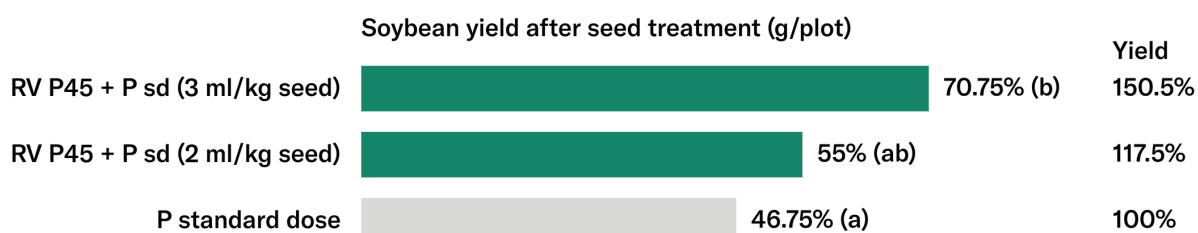

Crops

Wide range of crops: vegetables, potatoes, ornamentals, berries, fruit trees, row crops (soybean, wheat, barley, rye, sugar beet, corn, buckwheat, sunflower, rice), etc.

Andermatt

Effect of RhizoVital P45 on soybean yield

Trial conducted by Ensayos del Sudeste, Argentina, 2021

Different application methods:

- Seed treatment
- Dipping
- Drenching
- Soil-spraying
- Injection into hydroponics

Early application is important:

- Treatment of soybean seeds for example
- Significant higher yield with the higher RhizoVital P45 dose
- Reapplication is recommended

Andermatt Group is a global leader in biological solutions

- Strict quality control for consistent high quality
- Innovative in-house R&D to support growing portfolio
- Long-standing field support in different markets since 1988

Healthy Food and Healthy Environment, for all
