

# Is it natural?

Mint plants are grown in warm and fairly humid regions around the world – mainly in the US, China and India. The mint plants are harvested so the oil can be extracted

# Will it work in all types of stores?

Biox-M is applied by fogging it as a very fine mist. It easily spreads and can therefore be used in all types of stores.

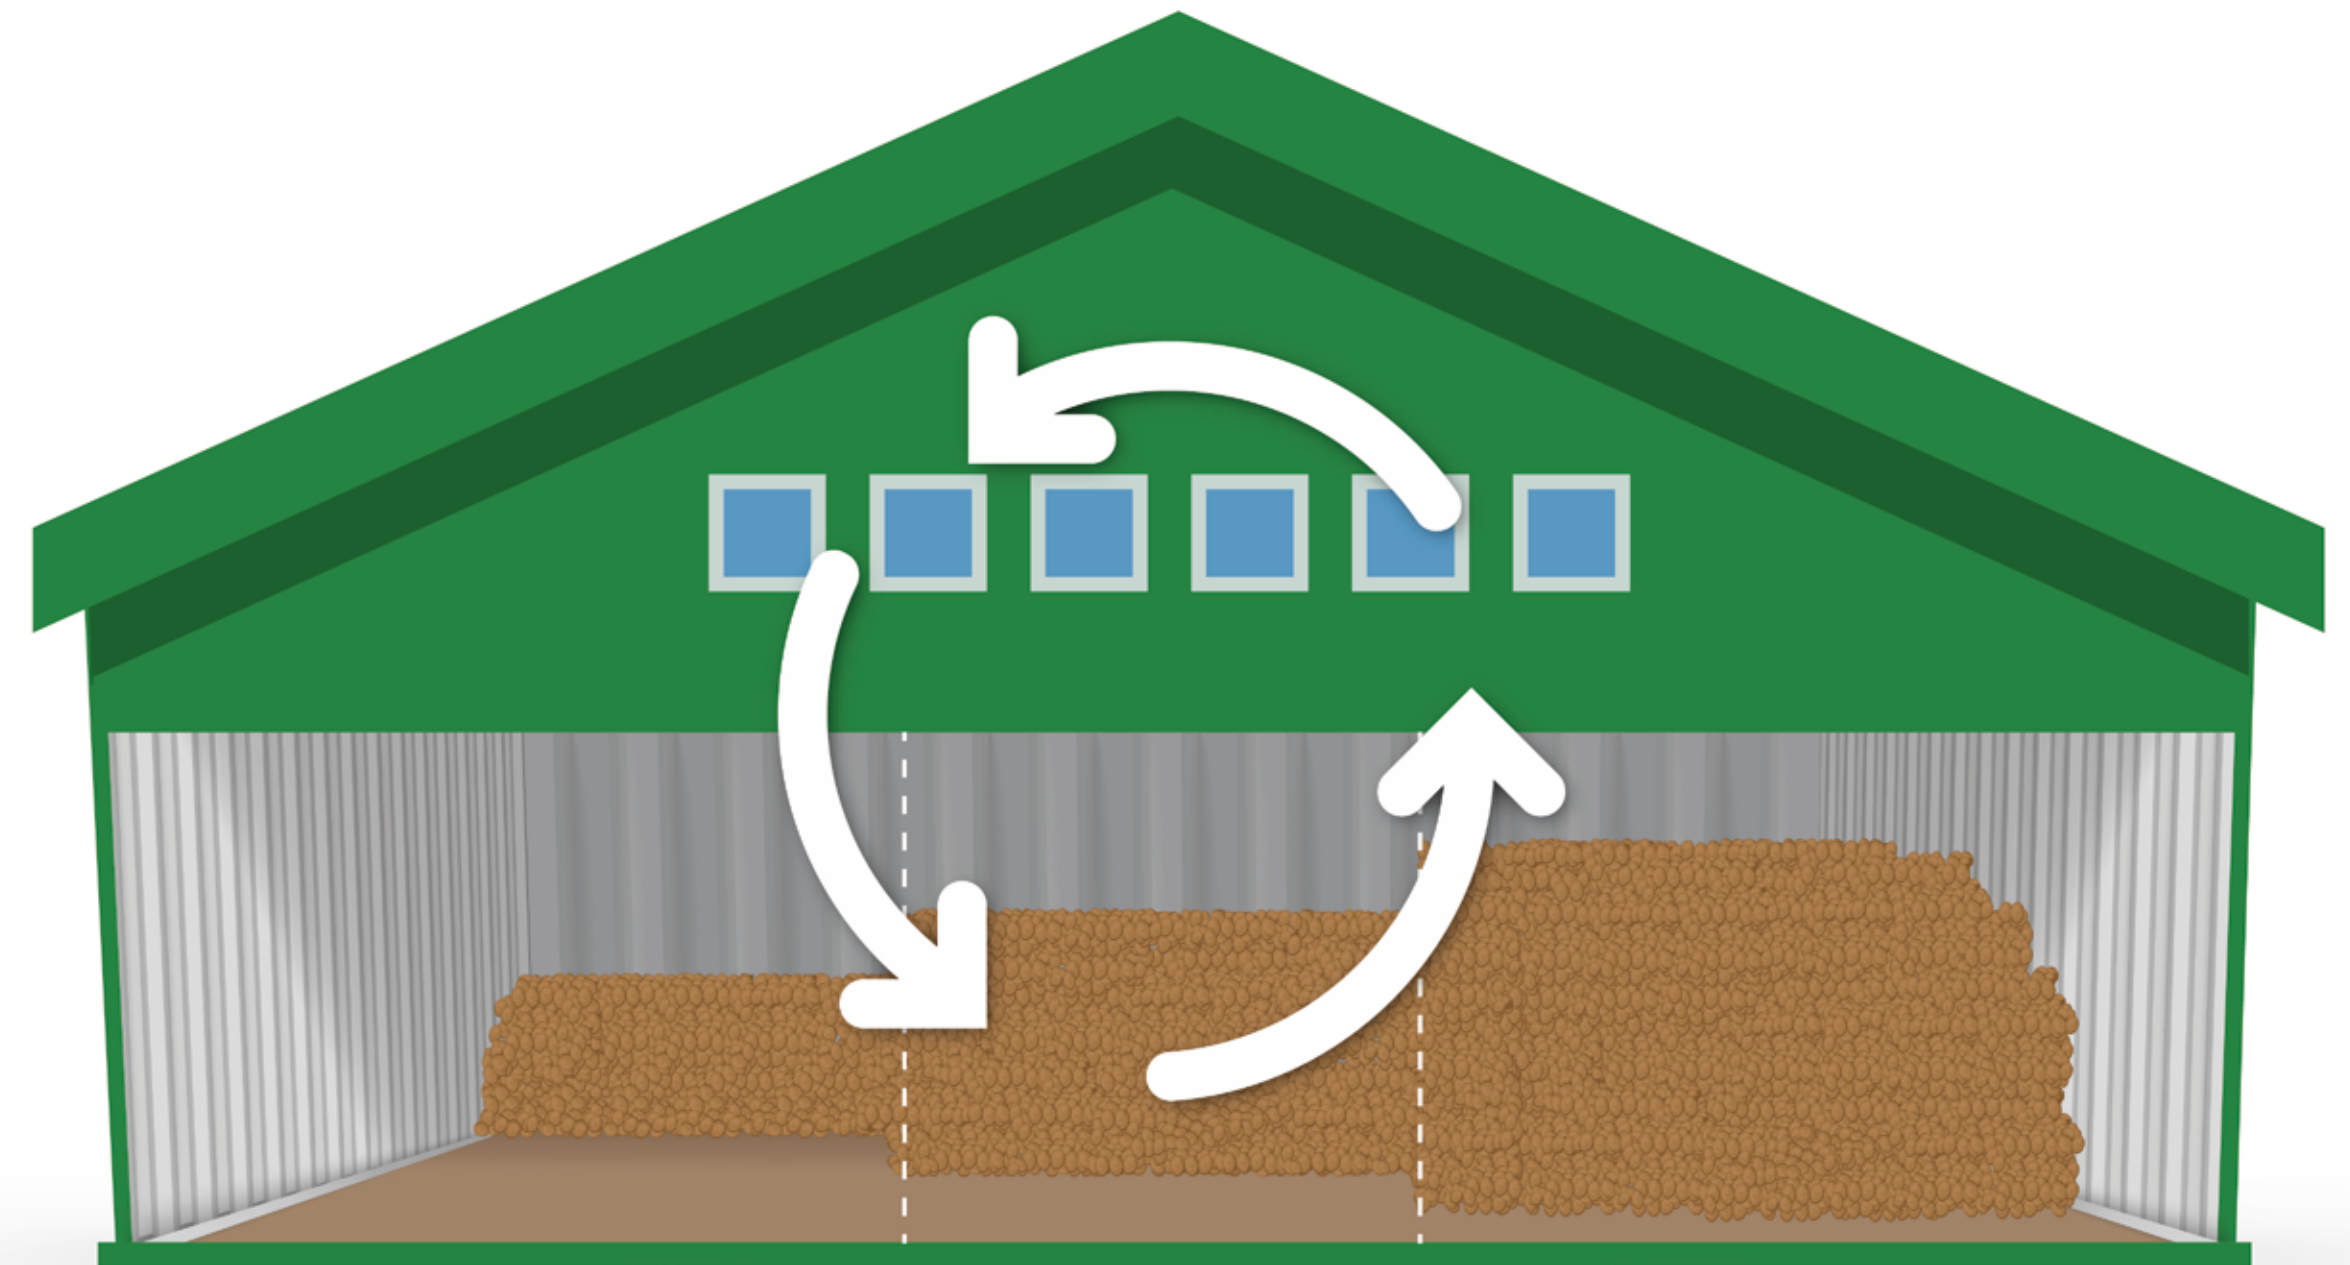

A flexible product for an unpredictable world.

**biox-m**<sup>®</sup>

# Will it work in partly filled stores?

It does not matter if a store is full or only partly filled. Thanks to the micro droplets in the mist, Biox-M can be targeted on the potatoes without losing its strength.

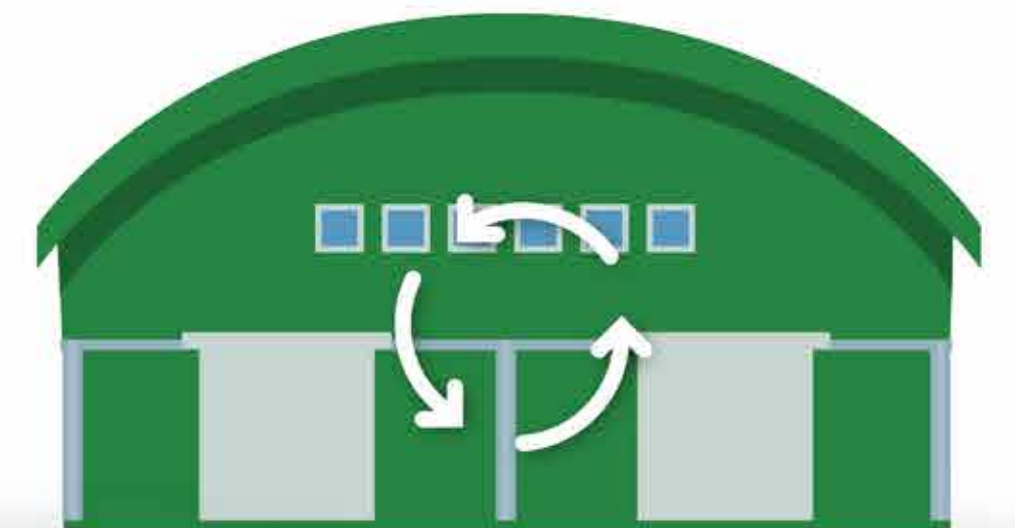

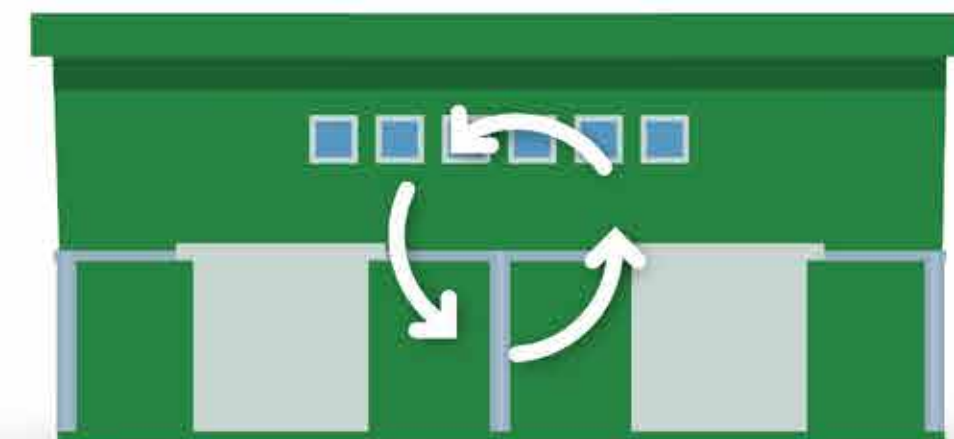

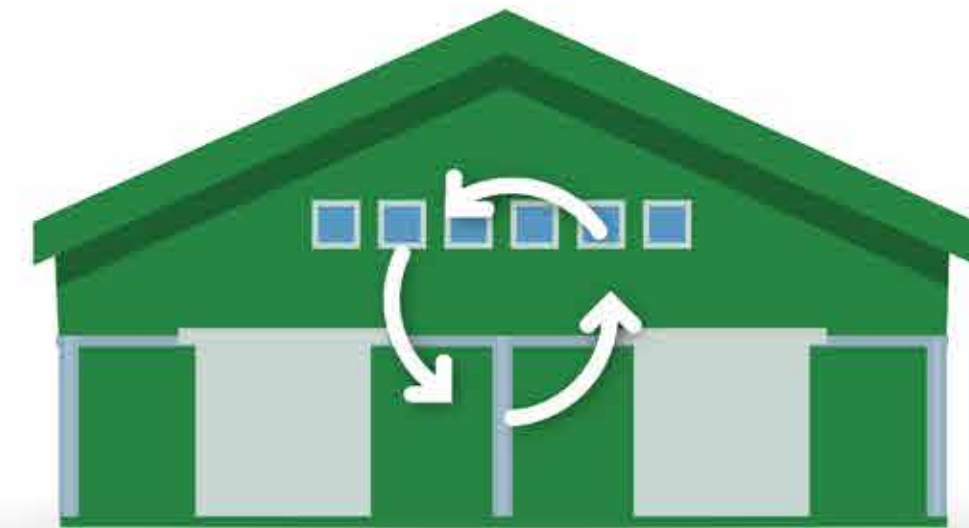

A flexible product for an unpredictable world.

**biox-m**<sup>®</sup>

# Will it work for special types of roofs?

Whether you have a flat roof, a pointed roof or a gable roof, Biox-M will still spread perfectly through the potatoes, using the ventilation system.

**biox-m**<sup>®</sup>

# What is the burning effect on the sprouts?

Biox-M applied on white points has a direct impact, turning them black. By applying Biox-M in this stage, you benefit both from the preventative and the curative effect of mint oil.

**biox-m**<sup>®</sup>

# What equipment do I need?

Use professional fogging equipment like Electrofog and Synofog machines. These guarantee a high quality mist and the best results. Also Cropfog and Resonator hot fogging machines are well adapted to apply Biox-M safely.

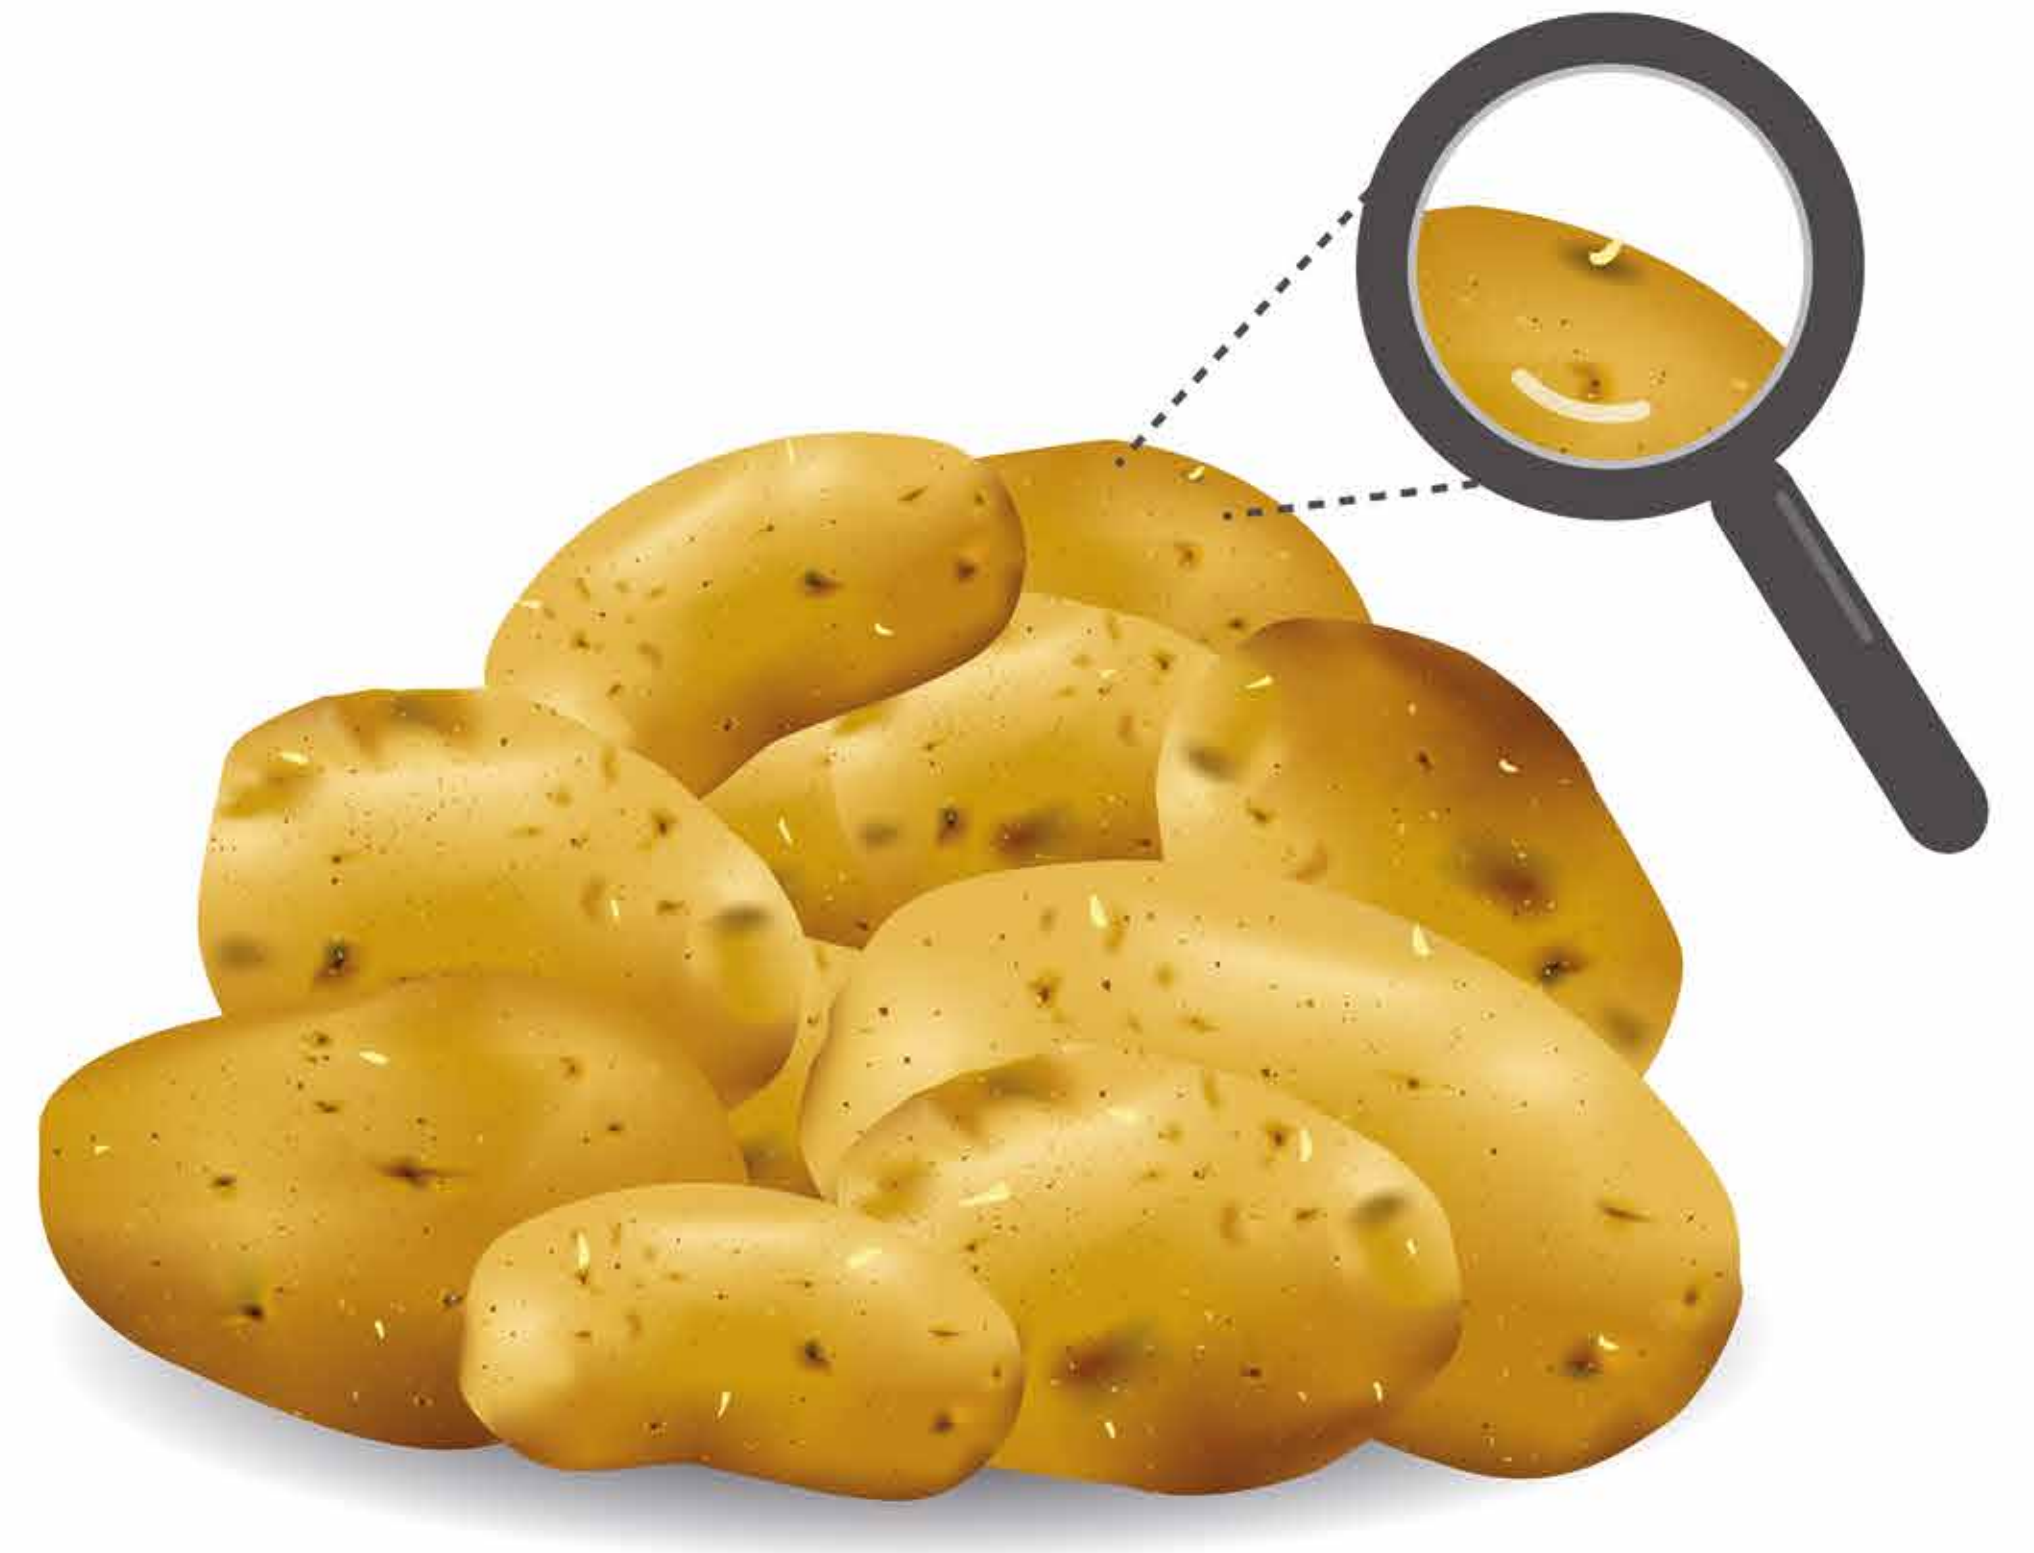

A flexible product for an unpredictable world.

**biox-m**<sup>®</sup>

# When is the best time to apply?

The best moment to apply Biox-M is when the first white points appear. In this way you only apply when needed, while obtaining the best results: potatoes in top shape until the end of the season.

A flexible product for an unpredictable world.

**biox-m**<sup>®</sup>

# What if sprouts are there?

In case sprouts until 5 mm already appeared, Biox-M can burn them off, bringing potatoes back into a calm state. This gives you full flexibility in case of difficult circumstances.

A flexible product for an unpredictable world.

**biox-m**<sup>®</sup>

# How long do I have to wait?

You have to wait for 12 days after a Biox-M application before you take your potatoes out of the store.
