Andermatt: Leading the Way in Natural Honey Bee Health Solutions

Beekeepers can rely on Andermatt for a full range of natural solutions to support overall Honey bee health.

As the only provider offering a complete solution for Varroa control, Andermatt delivers effective, sustainable and safe care for your colonies.

“Andermatt proudly offers a holistic range of solutions for Honey bee health. To ensure healthy bee populations, we’ve introduced natural bee nutrition to complement our approved veterinary medicines, further supporting our Varroa control program. Our mission goes beyond providing products – we’re building a community committed to fostering healthy bees and a sustainable environment.”

Andermatt BioVet

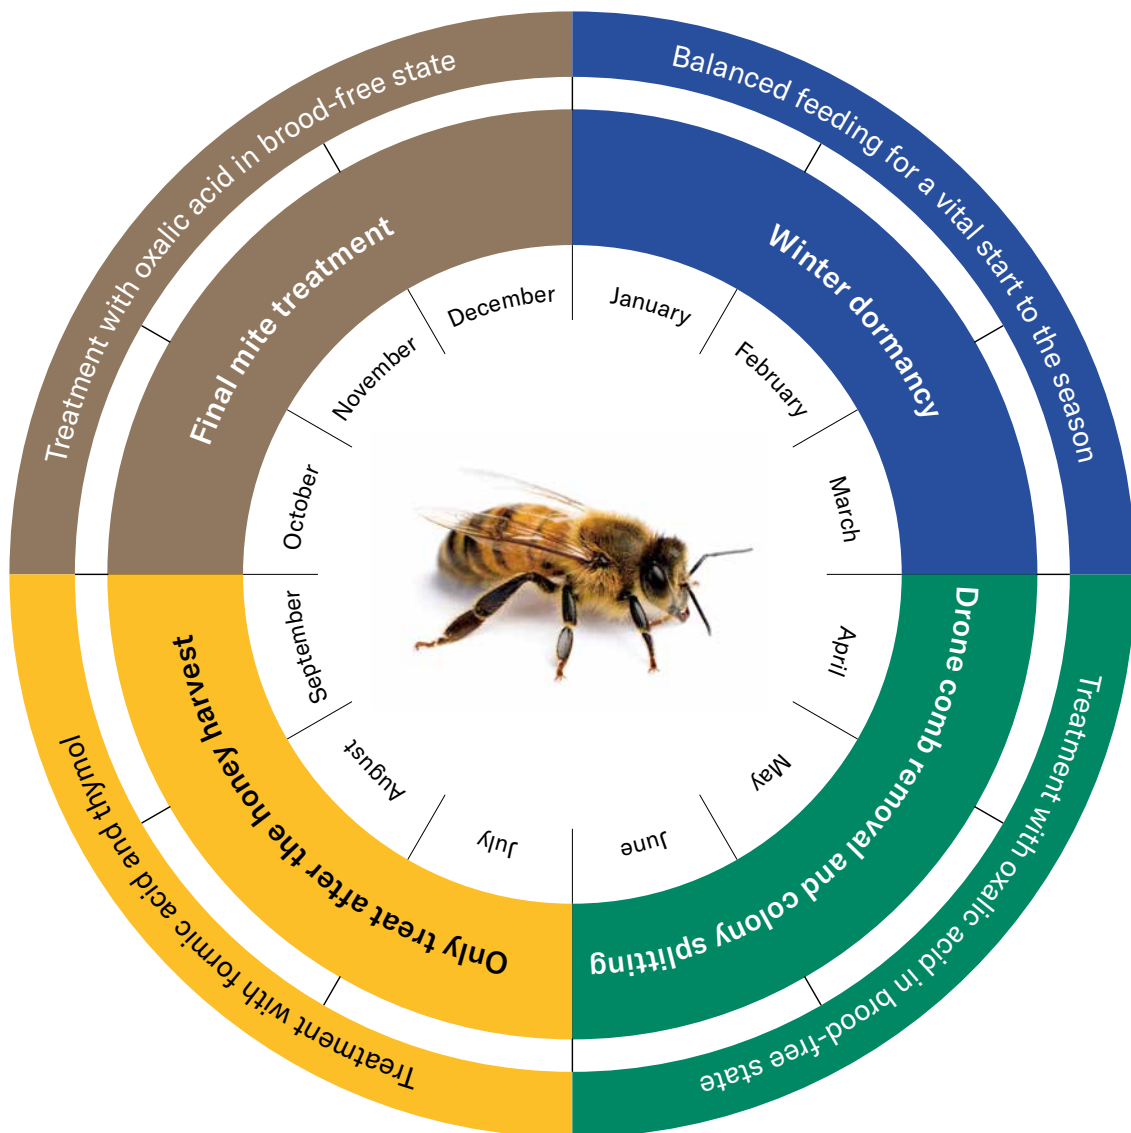

Varroa control

Healthy Honey bee colonies are dependant on effective varroa treatment throughout the entire bee season.

Andermatt offers a complete solution that incorporates the three approved natural ingredients; formic acid, thymol, and oxalic acid.

The year round care program delivers effective, sustainable, and safe care for colonies 365 days a year!

Nutrition

Healthy nutrition for healthy Honey bees.

Andermatt's fondants* are entirely plant-based, designed to align with the natural biology of Honey bees. Ready to use and easy to apply, they offer a simple and effective solution for Honey bee health.

Our Honey bee feed products are free from:

- Additives
- Artificial enzymes
- Starch or indigestible sugars
- Preservatives
- HMF (hydroxymethylfurfural)
- Animal proteins

Apiforme

Complimentary feed attractant

Apiforme Royal

Supportive nutritional fondant to encourage good breeding patterns.

*Fondant: A solid, sugar-based food that provides bees with essential carbohydrates.

Formic acid dispensers

We provide a range of cost-effective and efficient formic acid dispensers, each tailored to suit different foraging systems.

FAM-Dispenser

The FAM dispenser is compact, easy to use, and allows for simple adjustments. Both dispensers offer high efficacy when paired with formic acid and are durable enough for several years of reuse.

Liebig-Dispenser

The Liebig dispenser is our most popular option. With its optimized bottle design, it fits neatly under both flat and foraging bars, ensuring versatile use.

Vaporization with Varrox Eddy

The Varrox Eddy is the safest hands-free device on the market, allowing beekeepers to treat or prepare multiple colonies simultaneously without the hassle of cords.

Varrox Eddy

It's gentle on honey bees and safe for beekeepers. Lightweight and easy to use, weighing less than 600 g, the treatment time and temperature are electronically controlled. With LED lights, beekeepers can monitor the progress from a safe distance, ensuring efficient and safe colony care.
