

Nexula®-N Easy Flow

From Air to Earth. Nature's Nitrogen, Delivered.

A next-generation nitrogen-fixing biostimulant that simplifies planting and supports season-long crop performance.

Formulated with *Priestia megaterium* strain PHP1706, Nexula®-N Easy Flow is a dry powder seed treatment that fixes atmospheric nitrogen and delivers it to the crop throughout the season.

Whether you are planting maize, wheat, sunflower, or soya, this easy-to-use biostimulant solution offers more than just nutrition, it offers confidence.

Nitrogen-fixing bacteria
to reduce synthetic
inputs by up to 40%*

Simple dry application
no water, no drying,
no refrigeration

Good compatibility
with most
seed-applied products

Stable shelf life
up to 24 months at
room temperature

Added graphite
for smooth seed flow
and uniform crop stands

**Safe, sustainable
and versatile**
for a range of crops

Why Choose Nexula®-N Easy Flow?

- ✎ Lower nitrogen input costs
- ✎ Reduce environmental nitrogen losses
- ✎ Consistent performance, even under abiotic stress
- ✎ Support soil and root health naturally
- ✎ One simple application at planting
