

A Global Network of Biological Experts

A Message from our CEO

At Andermatt, our mission has always been clear: to shape a healthier future for people and the planet through innovative biological solutions. What began as a pioneering vision more than three decades ago has grown into a global movement – one that places sustainability, science, and the success of farmers at the heart of everything we do.

Today, Andermatt stands as a trusted partner in over 60 countries, united by a shared belief in the power of nature to protect and enhance crop production. Our teams around the world work with dedication and integrity to provide effective, environmentally responsible solutions that help growers meet the challenges of modern agriculture – without compromising the health of ecosystems or future generations.

As a proudly independent family and employee-owned company, we have the freedom to invest for the long term. This means investing in research and innovation, expanding our presence across diverse markets, and building partnerships rooted in trust and shared values. Our goal is not only to replace conventional chemical inputs, but to offer a new standard – one where biologicals are proven, practical, and accessible to all.

Thank you for taking the time to learn more about who we are and what we stand for. Whether you are a grower, partner, advisor, or fellow innovator, we look forward to working with you to advance biological agriculture – together.

Our vision, *Healthy Food and Healthy Environment, for all*, highlights our commitment to promoting biodiversity and soil fertility for sustainable global nutrition. To achieve this, we offer effective biological and natural solutions, ensuring minimal residues and reducing unwanted long-term environmental impact.

Our Vision

Healthy Food and Healthy Environment, for all.

Our Mission

Andermatt's mission is to develop and provide effective, biological and natural solutions to replace chemical based products for crop production, home & garden, pest control, bee and farm animal health.

Andermatt Madumbi Biospecialist, Attie Odendaal engaging with macadamia growers from Welmac Farms, Mpumalanga, South Africa.

Dr. Isabel and Dr. Martin Andermatt pioneered the first registered biological granulovirus product, the foundation of which has resulted in Andermatt today.

About us

Our journey began in Switzerland in 1988, when Dr. Isabel and Dr. Martin Andermatt registered the first granulovirus; ushering in a new era in agriculture.

In the decades that have followed, biological experts and agricultural pioneers around the world have joined forces to form Andermatt.

With products available in over 60 countries globally, our specialists bring regional insight, cultural understanding, and scientific expertise to the table.

Our Values

From a strong vision to a global leader, we have championed nature-based crop protection for decades – replacing chemicals with biological solutions that work for growers, people, and the planet.

Our team represents our commitment to a safer, more sustainable future, and as custodians of the Andermatt vision, our values tie us together.

Integrity

In our decisions and actions, balancing agriculture with nature. Integrity is in our DNA as a family and employee-owned company, committed to long term sustainable growth.

Excellence

High quality standards that are non-negotiable. Andermatt stands apart on quality, and this drives our purpose every day.

Innovation

Through our strong Research & Development focus, with an ecosystem of experts dedicated to innovating new and existing solutions.

Passion

Likeminded companies with a shared vision for sustainability. Passionate employees across the globe, dedicated to leading change in the way food is grown.

Our Expertise

We are specialists in biological solutions, combining science with practical know-how. From research to real-world application, our innovations protect food, nature and the environment.

Our People

Our passionate, global teams bring local insight, cultural understanding and scientific excellence to support growers, home and garden uses, and beekeepers across the globe.

Why Andermatt?

Biological Pioneers

With a proven track record of over 35 years, Andermatt is proud to offer natural solutions for crop production, home & garden, pest control, bee and farm animal health.

Swiss Excellence

Andermatt upholds rigorous quality standards synonymous with Swiss precision.

Global Expertise

With a diverse team of biological experts worldwide, Andermatt offers cutting-edge solutions.

Local support

Through subsidiary companies and partners, Andermatt provides localized expertise to support growers effectively.

Knowledge Ecosystem

Knowledge transfer from continent to continent, country to country and from laboratories to the field, lay a solid foundation for biological efficacy.

Integrity

As an independent family and employee-owned company, Andermatt is aligned to building long-term business partnerships.
